## CONTENTS

*Murray Rebner, Barry H. Gross,  
John M. Robertson, David R. Pennes,  
David L. Spizarny and Gary M. Glazer*

103 CT evaluation of mediastinal masses

*Scott J. Savader, Steven R. Nokes and  
Gary Chappel*

111 Case report and review: computed tomography of multiple nodular pulmonary amyloidosis

*Peter G. Bernad and H. T. Ballantine*

117 Computed tomographic analysis of bilateral cingulotomy for intractable mood disturbance and chronic pain

*T. M. Kolawole, P. J. Patel and  
A. H. Mahdi*

125 Computed tomographic changes in juvenile hemiplegia

*Shoji Asari, Yuji Yamamoto and  
Toru Satoh*

131 Direct CT demonstration suggesting oculomotor nerve avulsion following minor head trauma: case report

*David W. Dunn and Leon A. Weisberg*

135 Computed tomography of the brain in metabolic diseases involving the central nervous system in children

*Robin E. Osborn and Gerald Kirk*

141 Cerebral arterial fenestration

*David W. Dunn and Leon A. Weisberg*

147 Computed tomography of the brain in asphyxiated infants

*Steven S. Guest, Carlos J. Sivit,  
William J. Meisler, Anthony C. Stevens  
and Gary L. Simon*

151 Intracranial tuberculosis due to *Mycobacterium bovis*
